Possibilities for the provider to verify the submitted bids (API)

BSP API endpoint for retrieving the current bid status from regelleistung.net

GET **/bids** List submitted bids (optionally capacity or energy market)

Returns the list of all submitted capacity/energy bids and complex bid components sorted in the following order:

- `productType` ,
- `productName` ,
- `state` ,
- `revisionTimestamp` ,
- `id` .

The result list can be reduced as required by specifying combinations of different filter parameters.
